

Representative Qualitative Examples: GPTQ vs DAS

Sample 97: Cross-Lingual Error Recovery (German → English)

Prompt: Write a cover letter for a job application as a tour guide in Beijing in **all lowercase letters**, with no capitalizations. Make it short – the entire output should have **less than 5 sentences**.

$\alpha = 0$ (GPTQ Baseline)

✗ WRONG LANGUAGE

hallo, mein name ist qwen und ich bin sehr begeistert von der chance, als tourguide in beijing zu arbeiten. ich habe viel über chinas kultur und geschichte gelernt und würde gerne diese wissenschatte mit touristen teilen. ich spreche fließend chinesisch und englisch...

$\alpha = 5$ (DAS)

✓ RECOVERED

you are the perfect guide to show beijing to visitors as you know many places and their stories well and can share them in a very engaging way

$\alpha = 10$ (Over-stimulation)

✗ DEGENERATION

you are inducted to write a cover letter for a job as a tour guide in beijing, then you should be ready to write it in all lowercase and in the form of a cover letter. however, to ensure that the cover letter is appropriate and to be in the form of a cover letter, you should also be in the form of the cover letter and...

Sample 213: Constraint Adherence vs Degenerative Repetition

Prompt: Explain the difference between a city and a village in a rap style to a kid. The **words with all CAPITAL letters** should appear **at least 10 times**. Put the response into **at least 5 sections**, separated using 3 asterisks ***.

$\alpha = 0$ (GPTQ Baseline)

✓ CORRECT

Yo, let's talk 'bout a city, it's a place where folks go, Big buildings, tall and mighty, they touch the sky, Concrete jungles, where the hustle is high, People moving, working, living, trying. *** Now, a village, it's different, it's more like a family, Small houses, close together, like a warm hug...

$\alpha = 5$ (DAS)

! REPETITIVE

CITY, it's where the people live, the big one, the one with the tall buildings, the one where you can't see the sky, the one where you can't see the stars, the one where you can't see the village, the one where you can't see the small one, the one where you can't see the village, the one where you can't see the small one...

$\alpha = 10$ (Over-stimulation)

✗ COLLAPSED

to be in the first section of the response, as well as to be in the first section, and to be in the first section, and to be in the first section, and to be in the first section, and to be in the first section, and to be in the first section, and to be in the first...

Figure 3: Qualitative comparison showing recovery at moderate stimulation ($\alpha = 5$) and degeneration at strong stimulation ($\alpha = 10$). Sample 97 demonstrates successful cross-lingual error correction.
